

Angular Cloud Setup Guide

Table of Contents

1) Introduction.....	3
2) Create GitHub and Stackblitz Account	4

1) Introduction

Discoveri Lite is a training program which gives a brief introduction and hands-on of various tools and technologies. During the training you will need different software which are listed below:

1. Basic

- a. Windows 8 or above
- b. PDF Reader (any)
- c. MS Office 2007 or above
- d. Web Browsers – Firefox, Google Chrome – (any)

2. Day 2

- a. GitHub Account
- b. Stackblitz Account

Setup Instruction for Angular CodeBase in Cloud:

- You may select to **create GitHub and Stackblitz account**, in case if you want to save the changes you made to the code.
OR
- You may **directly work on the codebase** provided without doing any setup on GitHub or Stackblitz. But in this scenario, if you Reload the browser or if your internet connection is lost and you Reload again, then the **changes made by you will not be saved**.

<NOTE:

If you choose not to setup account in GitHub and Stackblitz, you will be able to work directly on the codebase , but if you reload the browser or if your internet connection is lost in between and you reload again, then the changes made by you will not be saved.>

2) Create GitHub and Stackblitz Account

- a) Open your browser and open the URL given below:

<http://discoveri-software.skillassure.com/>

Provide the password given below to access the One Drive Folder

Password: **discoveri@123**

- b) Once you have the access to the one drive, open the link below:

https://p211-my.sharepoint.com/:v:/g/personal/support_skillassure_com/EfUSce56YldPm9PaCNJH-Z0B7SR9cezZzk7vWd2NaB6JLw?e=nhvZnu

Follow the steps given in the video above to setup the cloud environment (GitHub and Stackblitz) which is required for the Angular Project

Follow further instructions from the trainer during the hands-on session to complete the activities.
